

# How to extend the time on 3ds Max

## OBJECTIVE

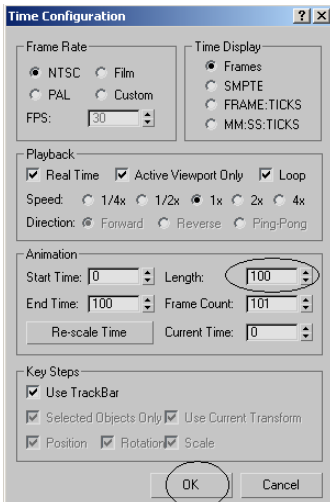

These steps will show you how to change the time configuration in 3ds Max so that you can change the length of your animation.

## STEPS

1. On 3ds Max, **click on the Time Configuration** button on the bottom-right corner of the software window.

2. On the Time Configuration window, change the length from 100 to **200** and click **OK**.

3. You'll see then the timeline extended at the bottom of the screen to 200 frames.
